RocLoc Lifeboat Release System

The patented RocLoc technology is a new approach to lifeboat release mechanisms specifically designed for the cruise and shipping industries.

The RocLoc meets all proposed requirements of the new SOLAS and LSA Codes. The mechanisms enhanced locking stability and superior warning indicators ensures the lifeboat will not release prematurely.

Every RocLoc on-load release hook includes the following design features:

- Constructed from corrosion resistant 316L Stainless Steel.
- Inherent locking stability, even with broken cables.
- Easily retrofitted to virtually all makes of lifeboats.
- Simple and easy to operate.
- Low maintenance and servicing costs.
- Clear and easy to read failure warning indicators.

Additional features of RocLoc include:

- Scientifically proven to be safer than first generation release systems.
- Was the first patented fail-safe release hook of its kind.
- Enables training drills without the risk of premature opening.
- Comes with complimentary training manuals (electronic and/or hard copy).

Design and Class approved by:
SOLAS, LSA, IMO, LR, DNV, MED, ABS

Safelaunch Lifeboat Release System

Safelaunch was designed, developed and manufactured by Survival Craft to provide a safe and easy way of launching and retrieving conventional davit launched lifeboats and rescue boats.

The original Safelaunch was released in 2005 to industry acclaim as a step forward in both innovation and health and safety. Safelaunch features an array of innovative design features which have helped it become the leading global system for davit launched lifeboats and rescue boats.

Since 2009, we have evaluated and researched how Safelaunch could be further enhanced. By undertaking a number of different evaluations, listening to client feedback and in-depth analysis of how Safelaunch is used we developed Safelaunch 2011.

Safelaunch 2011 features a variety of new and improved features including visual indicators, Integrated Fall Prevention Device (FPD) and more. Safelaunch has been designed so it can easily be retrofitted to any lifeboat or rescue boat.

Using only the highest quality materials and manufacturing standards ensures Safelaunch is reliable and robust requiring minimum maintenance.

Our installation team will train your crew on correct operation and maintenance. This can also be refreshed during the annual maintenance inspection.

About RocLoc and Safelaunch

RocLoc Key Facts

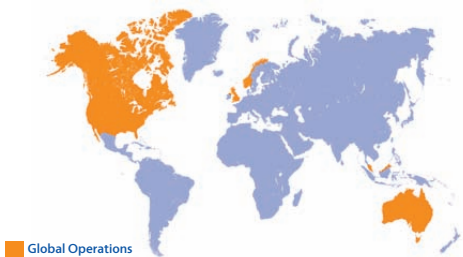

- Specifically designed for the cruise and shipping industries.
- Designed with easily viewable locking interfaces.
- Designed to be compatible with virtually all makes of lifeboats.
- Designed with inherent locking stability.
- Designed with only two moving parts.
- Low maintenance costs.
- Certificate and manuals.
- State-of-the-art computer based training.

Safelaunch Key Facts

- Meets all the latest SOLAS/LSA regulations on release gear.
- High quality materials and manufacturing process.
- Stainless steel minimises corrosion and reduces maintenance.
- Visual indicators for safety.
- Retrofitted to any lifeboat.
- Simplified user operation.
- Designed for use in all climates and conditions.
- Approved for use by Lloyds Register, Det Norske Veritas, and American Bureau of Shipping.

An Introduction to Survival Craft Inspectorate

Global Operations

United Kingdom

Norway

United States of America

Canada

Malaysia

Singapore

Australia

Since 1991 Survival Craft has grown to become a leading global supplier of certified safety equipment and services to an international portfolio of customers.

Survival Craft Inspectorate manufacture a diverse range of lifeboats and vital support systems for installation on ships and oil and gas industry assets. We also supply and maintain certified marine safety equipment to a number of leading shipping and oil and gas customers around the world.

We work closely with you to develop comprehensive maintenance plans that are all about safety, reliability and regulatory compliance. Our advanced design, manufacturing, inspection and maintenance systems are in full compliance with the latest industry regulations and codes.

We can provide a single supplier range of solutions thanks to our integrated design, sales, installation and commissioning service – supplemented by ‘through life’ inspection, maintenance and testing.

Since 1991 we have grown our capabilities and our global network of bases to support your safety objectives. We now operate in the UK, Norway, USA, Canada, Malaysia, Singapore and Australia: a strategic network of offices that guarantees you consistent quality and continuity of service, as you move your assets around the globe
